

School District of Poynette STUDENTS

Acceptable Use Policy for Technology Resources

7540.03 - **STUDENT TECHNOLOGY ACCEPTABLE USE AND SAFETY**

Technology has fundamentally altered the ways in which information is accessed, communicated, and transferred in society. As a result, educators are continually adapting their means and methods of instruction, and the way they approach student learning to incorporate the vast, diverse, and unique resources available through the Internet. The Board provides technology resources (as defined in Bylaw 0100) to support the educational and professional needs of its students and staff. With respect to students, District Technology Resources afford them the opportunity to acquire the skills and knowledge to learn effectively and live productively in a digital world. The Board provides students with access to the Internet for limited educational purposes only and utilizes online educational services/apps to enhance the instruction delivered to its students. The District's computer network and Internet system do not serve as a public access service or a public forum, and the Board imposes reasonable restrictions on its use consistent with its limited educational purpose.

The Board regulates the use of District technology resources by principles consistent with applicable local, State, and Federal laws, the District's educational mission, and articulated expectations of student conduct as delineated in the Student Code of Conduct. This policy and its related administrative guidelines and the Student Code of Conduct govern students' use of District Technology Resources and students' personal communication devices when they are connected to the District computer network, Internet connection, and/or online educational services/apps, or when used while the student is on Board-owned property or at a Board-sponsored activity (see Policy 5136).

Users are required to refrain from actions that are illegal (such as libel, slander, vandalism, harassment, theft, plagiarism, inappropriate access, and the like) or unkind (such as personal attacks, invasion of privacy, injurious comment, and the like). Because its Technology Resources are not unlimited, the Board has also instituted restrictions aimed at preserving these resources, such as placing limits on use of bandwidth, storage space, and printers.

Users have no right or expectation to privacy when using District Technology Resources (including, but not limited to, privacy in the content of their personal files, e-mails, and records of their online activity when using the District's computer network and/or Internet connection).

The Board may not be able to technologically limit access to services through its technology resources to only those that have been authorized for the purpose of instruction, study and research related to the curriculum. Unlike in the past when educators and community members had the opportunity to review and screen materials to assess their appropriateness for supporting and enriching the curriculum according to adopted guidelines and reasonable selection criteria (taking into account the varied instructional needs, learning styles, abilities, and developmental levels of the students who would be exposed to them), access to the Internet, because it serves as a gateway to any publicly available file server in the world, opens classrooms and students to electronic information resources that may not have been screened by educators for use by students of various ages.

Pursuant to Federal law, the Board has implemented technology protection measures, that protect against (e.g., filter or block) access to visual displays/depictions/materials that are obscene, constitute child pornography, and/or are harmful to minors, as defined by the Children's Internet Protection Act. At the discretion of the Board or the District Administrator, the technology protection measures may be configured to protect against access to other material considered inappropriate for students to access. The technology protection measures may not be disabled at any time that students may be using the District technology resources, if such disabling will cease to protect against access to materials that are prohibited under the Children's Internet Protection Act. Any student who attempts to disable the technology protection measures will be subject to discipline.

The Board utilizes software and/or hardware to monitor online activity of students and to block/filter access to child pornography and other material that is obscene, objectionable, inappropriate and/or harmful to minors. "Harmful to minors" is a term defined by the Communications Act of 1934 (47 U.S.C. 254(h)(7)) as any picture, image, graphic image file, or other visual depiction that:

- A. taken as a whole and with respect to minors, appeals to a prurient interest in nudity, sex, or excretion;
- B. depicts, describes, or represents, in a patently offensive way with respect to what is suitable for minors, an actual or simulated sexual act or sexual contact, actual or simulated normal or perverted sexual acts, or a lewd exhibition of the genitals;
- C. taken as a whole, lacks serious literary, artistic, political, or scientific value as to minors.

At the discretion of the Board or the District Administrator, the technology protection measure may be configured to protect against access to other material considered inappropriate for students to access. The technology protection measure may not be disabled at any time that students may be using the District technology resources, if such disabling will cease to protect against access to materials that are prohibited under the Children's Internet Protection Act. Any student who attempts to disable the technology protection measures will be subject to discipline.

The District Administrator or designee may temporarily or permanently unblock access to websites or online educational services/apps containing appropriate material if access to such sites has been inappropriately blocked by the technology protection measure. The determination of whether material is appropriate or inappropriate shall be based on the content of the material and the intended use of the material, not on the protection actions of the technology protection measure.

The District Administrator may disable the technology protection measure to enable access for bona fide research or other lawful purposes.

Parents are advised that a determined user may be able to gain access to services and/or resources on the Internet that the Board has not authorized for educational purposes. In fact, it is impossible to guarantee students will not gain access through the Internet to information and communications that they and/or their parents may find inappropriate, offensive, objectionable or controversial. Parents of minors are responsible for setting and conveying the standards that their children should follow when using the Internet.

Pursuant to Federal law, students shall receive education about the following:

- A. safety and security while using e-mail, chat rooms, social media, and other forms of direct electronic communications;
- B. the dangers inherent with the online disclosure of personally identifiable information;
- C. the consequences of unauthorized access (e.g., "hacking", "harvesting", "digital piracy", "data mining", etc.), cyberbullying, and other unlawful or inappropriate activities by students online;
- D. unauthorized disclosure, use, and dissemination of personally identifiable information regarding minors.

Staff members shall provide instruction for their students regarding the appropriate use of technology and online safety and security as specified above. Furthermore, staff members will monitor the online activities of students while at school.

Monitoring may include, but is not necessarily limited to, visual observations of online activities during class sessions; or use of specific monitoring tools to review browser history and network, server, and computer logs.

Building Principals are responsible for providing training so that Internet users under their supervision are knowledgeable about this policy and its accompanying guidelines. The Board expects that staff members will provide guidance and instruction to students in the appropriate use of District technology resources. Such training shall include, but not be limited to, education concerning appropriate online behavior, including interacting with other individuals on social media, including in chat rooms, and cyberbullying awareness and response. All users of District technology resources (and their parents if they are minors) are required to confirm their agreement to abide by the terms and conditions of this policy by signing the District technology use form.

Students will be assigned a school email account that they are required to utilize for all school-related electronic communications, including those to staff members, peers, and individuals and/or organizations outside the District with whom they are communicating for school-related projects and assignments. Further, as directed and authorized by their teachers, they shall use their school-assigned email account when signing-up/registering for access to various online educational services, including mobile applications/apps that will be utilized by the student for educational purposes.

Students are responsible for good behavior when using District technology resources - i.e., behavior comparable to that expected of students when they are in classrooms, school hallways, and other school premises and school-sponsored events. Communications on the Internet are often public in nature. The Board does not approve any use of its technology resources that is not authorized by or conducted strictly in compliance with this policy and its accompanying guidelines.

Users who disregard this policy and its accompanying guidelines may have their use privileges suspended or revoked, and disciplinary action taken against them. Users are personally responsible and liable, both civilly and criminally, for uses of District technology resources that are not authorized by this policy and its accompanying guidelines.

The Board designates the District Administrator and building principals as the administrator(s) responsible for initiating, implementing, and enforcing this policy and its accompanying guidelines as they apply to students' use of District technology resources.

School District of Poynette
Acceptable Use Policy for Technology Resources
Elementary Student User Policy Acknowledgement

Please read the following information carefully before signing this document. Use of technology resources is a privilege, not a right. As we continue to promote the responsible use of this privilege, we are encouraging parents/guardians to discuss the content of this policy acknowledgement and the Acceptable Use Policy with their children. This form represents the contract of the parent/student that is outlined in the attached district technology policy and is authorized by signing this policy acknowledgment.

STUDENT

I have discussed the Acceptable Use Policy (AUP) and accompanying guidelines with my parent/guardian and my teacher, and understand that I must complete a class before I will be given access to use the Internet. I also understand that I will only be using the Internet when I am with a teacher or other staff member. I promise to use the Internet in a responsible, decent, ethical, polite, honest, efficient, and legal manner.

Student Name: (Please Print): _____

User Signature: _____

Date: _____ **Grade:** _____ **School:** _____

** Both sections must be signed before the designated student will be granted Internet access**

PARENT or GUARDIAN

As the parent or guardian of this student, I have read the district's Acceptable Use Policy (AUP) and this policy acknowledgement. I am aware that the AUP and all of its terms and conditions are included in this policy acknowledgement. I understand that my child must use district technology in a **responsible, decent, ethical, polite, honest, efficient and legal manner**. I understand that my child's access to the district network, Internet and technology resources is designed for educational purposes. I also understand that the Internet contains inappropriate material and that it is impossible for the School District of Poynette to restrict access to all controversial materials and will not hold the district responsible for materials acquired on the network. I allow my child to use the Internet despite this potential availability. I realize that my child may have the opportunity to disclose personally identifiable information that the district does prohibit but cannot always control. I understand that my child's violation of the district's AUP will result in the temporary or permanent loss of Internet and/or network access as well as other disciplinary action.

CHOOSE ONE OF THE OPTIONS LISTED BELOW:

_____ Accepting the conditions indicated above, I hereby give my permission for the district to issue my child a network account that provides access to the Internet and the other tools available on the district's network.

_____ Accepting the conditions indicated above, I hereby give my permission for the district to issue my child a network account that only provides access to Microsoft Office tools and other software but **I DO NOT want my child to have internet access.**

Parent or Guardian Name (Please Print): _____

Signature: _____ **Date:** _____

Please be aware that district policy does forbid unauthorized users to access the Internet. However, the district cannot guarantee that students will not gain unauthorized access through the sharing of passwords and logins. The School District of Poynette is not liable for such unauthorized access.
